Micro-Capsules in animal feed additives in the application

In recent years, the feed additive micro capsules, the research increasingly hot. As in the food industry earlier in the Micro Capsule technology, the vitamins and various food additives to the micro of the package. Microsoft's technology on feed industry in the food industry applications developed on the basis of the. feed additives, micro-capsules, the performance of the product has increased considerably, but at the same time has also increased the production costs. Urea micro capsules, can reduce the feeding times, Avoid ammonia poisoning and urea palatable, the shortcomings.
